SUBASH MAHENDRAN

Python Developer | AI/ML Engineer | Data Analyst

Chennai, India | +91 82203 03164 | subashrcm61@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence & Data Science graduate with hands-on experience in Python development, machine learning, deep learning, data analysis, dashboard development, full-stack AI applications, and freelance software delivery. Experienced in building practical ML solutions, troubleshooting applications, and delivering client-facing web applications.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, PostgreSQL, MySQL
Machine Learning: Scikit-learn, XGBoost, Regression, Classification, Random Forest, SVM, Feature Engineering, Model Deployment
Deep Learning & AI: TensorFlow, Keras, PyTorch, CNN, RNN/LSTM, NLP, Transformers, LLM Applications
Computer Vision & NLP: YOLOv8, OpenCV, Text Mining, Natural Language Processing, Object Tracking
Data Analytics & BI: Power BI, Tableau, Advanced Excel, Pandas, NumPy, EDA, Dashboard Development
Cloud, Web & Tools: Oracle Cloud Infrastructure (OCI), AWS, Next.js, Tailwind CSS, Supabase, Git/GitHub, Linux, REST API Integration, Vercel

PROFESSIONAL EXPERIENCE

Freelance Software & Web Developer **2025–Present**
Independent/Freelance

- Built and delivered 15+ software projects and 2 websites based on student, business, and individual requirements.
- Developed projects independently from requirement gathering through implementation, testing, documentation, and delivery.
- Engineered custom workflows including secure database schemas, dynamic frontends, and automated messaging endpoints with 100% on-time delivery.
- Worked across Python, AI/ML, data analytics, and web-development technologies depending on project scope.

ML Developer Intern **Jul 2025 – Aug 2025**
Nitroware Technologies

- Contributed to a full-stack software-failure prediction website using Python and machine-learning techniques.
- Applied multiple ML algorithms: Linear/Logistic Regression, Naive Bayes, Decision Trees, Random Forest, SVM, Gradient Boosting, XGBoost.
- Used synthetic data for model experimentation, application development, and testing.
- Collaborated with the development team to build, troubleshoot, and improve the prediction application; resolved 100+ development issues.

Python Developer Intern **Aug 2024 – Sep 2024**
Pantech AI

- Completed a Python-focused internship covering programming and software-development fundamentals.
- Worked on small Python projects as part of the internship's learning and implementation activities.

PROJECTS

SHEE'S SPA – Full-Stack Business Website [View Website] [View Project]

- Designed and developed the website from scratch using Next.js, Tailwind CSS, and Supabase.
- Implemented a customer appointment booking workflow (name, phone number, service, appointment time).
- Built Supabase-backed booking functionality with authentication restricted to the administrator portal.
- Developed an admin portal to view bookings and update status as Pending, Completed, or Cancelled.
- Integrated WhatsApp communication for the admin to message customers directly with appointment details.
- Managed the domain via GoDaddy and deployed the live site on Vercel within approximately one week.

AMR Insight – Antimicrobial Resistance Prediction [View Project]

- Developed an AI/ML solution to predict antimicrobial resistance patterns using hospital, pharmacy, environmental, and synthetic data.
- Implemented data processing and analysis using Python, Pandas, and NumPy.
- Applied Random Forest, SVM, and Neural Networks to identify resistance patterns and support early-warning healthcare insights.

Real-Time Object Detection for Autonomous Driving [View Project]

- Built a real-time computer-vision object detection project using Python, YOLOv8, and OpenCV.
- Implemented visual detection workflows oriented toward autonomous-driving scenarios.

MediSync – AI-Powered Patient Management System [View Project]

- Developed a full-stack hospital and patient management system as a solo project.
- Built a patient-accessible web interface that organizes medical documents in one place, with an integrated AI component.
- Tested the system using simulated hospital data and student users for functional validation.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional (OCP)
- Business Analytics with Excel – Simplilearn
- Natural Language Processing (NLP) and Text Mining Tutorial – Simplilearn
- HackerRank Python Certified
- HackerRank – SQL Certified
- Tata Data Visualisation – Forage
- HP LIFE AI, Data Science & Analytics

EDUCATION

B.Tech Artificial Intelligence & Data Science **2022 – 2026**
Dhanalakshmi Srinivasan College of Engineering and Technology (DSCET), Chennai

ACHIEVEMENTS & ACTIVITIES

- 1st Prize – Technical Quiz, Periyar Maniammai University, Thanjavur
- 1st Prize – Tech Quiz, AVC College of Engineering
- 1st Prize – Mystery Layer (ML Model Prediction), Saveetha University
- 2nd Prize – Code Debugging, AVC College of Engineering
- 2nd Prize – Air Crash Investigation, DSCET
- Runner-up – Technical Quiz, Tamil University, Thanjavur
- Presented technical papers at IIT Madras, Tagore Engineering College, and Vels College, Avadi
